- Deflexion of thin rectangular plates clamped at the edges and uniformly loaded, 1072.
- Diamagnetic susceptibilities of some complex ions, 1025.
- Dielectric constant of mixed crystals of sodium ammonium and sodium potassium tartrates, 70.
- Differential equations involving three-term recursion formulas, 245.
- Diffraction of beta-rays, 953.
- of electromagnetic waves from an electrical point source round a finitely conducting sphere, with applications to radiotelegraphy and the theory of the rainbow. Part I., 141; Part II., 825.

- Diffusion potentials, the thermodynamical treatment of, 304.
- Discontinuities of the background, the effect of, on the evaluation of the intensities of X-ray reflexions from crystalline powders, 473.
- Donnan (F. G.), Teller (E.), and Topley (B.), fluctuations of composition in a system of molecules in chemical equilibrium, 981.
- Dube (G. P.), a note on the calculation of the Peltier heat, 598.
- Eddy-current heating of composite cylindrical systems, 1.
- Eigen values, on the variation calculation of, 114.
- Einstein's gravitational field equations, 814.
- Elastic scattering by hydrogen and helium, 971.
- of a beam of particles by atoms, the theory of, 964.
- Electrodeposited chromium, transition from hexagonal to cubic, 511.
- Electromagnetic waves, the diffraction of, from an electrical point source round a finitely conducting sphere, with applications to radiotelegraphy and the theory of the rainbow, 141.
- Electrons in bromine, the behaviour of, 177.
- Evans (Prof. E. J.) and Marsden (Dr. C. Joyce), the magneto-optical dispersion of organic liquids in the ultra-violet region of the spectrum.—Part XI. The magneto-optical dispersion of methyl malonate, isopropyl propionate, isopropyl butyrate, ethyl isobutyrate, and tertiary-butyl alcohol, 377.
- Evans (Dr. R. C.), the dielectric constant of mixed crystals of sodium ammonium and sodium potassium tartrates, 70.
- Fabian (Dr. W.), transformation of curves arising from Lebesgue complex integration, 256; conditions under which functions are measurable, integral, and differentiable, 807.
- Fisher (E.), some differential equations involving three-term recursion formulas, 245.
- Flat plate, the flow past a, to Oseen's approximation, 704.
- Fletcher (H. M.), variation of resistance and power factor of glass condensers with radio-frequencies, 319.
- Florin (Dr. H.) on Boole's operators in the calculus of finite differences, 492.
- Fourier expansions obtained operationally, 1055.
- Free vibrations with non-linear elasticity, 272.
- Frequencies and nodal systems of circular plates, 1041.
- Functional dynamics, periodic motion in, 26.
- Functions are measurable, integrable, and differentiable, conditions under which, 807.
- Gas mixtures, measurements of thermal diffusion in, 1103.
- Geiger counter, note on the correction to be applied to the results obtained by using a, 572.
- Geiger-Müller counters for radiochemical investigations, 553.
- Gemant (A.) on free vibrations with non-linear elasticity, 272.
- Ghosh (Prof. M.), Mukherjee (Prof. K. K.), and Kar (Prof. K. C.), the theory of elastic scattering of a beam of particles by atoms, 964.
- Gill (E. W. B.), thermionic emission, 1093.
- Glass condensers with radio-frequencies, variation of resistance and power factor of, 319.
- Goodier (Dr. J. N.), supplementary note on a general proof of Saint-Venant's principle, 325.
- Green's functions in the theory of heat conduction, on the operational determination of, 62.
- Greenwood (Robert) and Condon (E. U.), a new approach to the hermite polynomials, 281.
- Hamblin (F. T.), an apparatus for the production of radioactive elements by means of radium, 582.
- Hamblin (F. T.) and Johnson (Dr. C. H.), Geiger-Müller counters for radiochemical investigation, 553.
- Hardy (H. C.) and Colwell (R. C.), the frequencies and modal systems of circular plates, 1041.
- Heat conduction, some two-dimensional problems in, 410.
- loss by natural convection from vertical cylinders, 634.
- Hermans (J. J.) and Oosterhoff (L. J.), the thermodynamical treatment of diffusion, 304.

- Hermite polynomials, a new approach to the, 281.
- Hillson (S. P.) and Chalklin (Dr. F. C.), the  $L_x$ -lines of some nickel alloys, 190.
- Howell (W. T.) on products of Laguerre polynomials, 396; on some operational representations of products of parabolic cylinder functions and products of Laguerre polynomials, 1082.
- Humbert (Prof. Pierre) on Bessel product functions, 888.
- Ice-pail, the two-dimensional, 1127.
- Impedances and admittances in the method of symmetrical coordinates, transformation formulæ of, 195.
- Integral, on the determination of, 206.
- Joglekar (M. S.), the Raman spectra of some chlorocarbonates, 405.
- Johnson (Dr. C. H.) and Hamblin (F. T.), Geiger-Müller counters for radio-chemical investigation, 553.
- Johnson (Dr. F. W.), the adsorbed moisture films on the surface of glazed porcelain, 797.
- Jones (Prof. E. Taylor) on the properties of certain vibratory doublets, 458.
- Kar (Prof. K. C.) on the elastic scattering by hydrogen and helium, 971.
- Kar (Prof. K. C.), Ghosh (Prof. M.), and Mukherjee (Prof. K. K.), the theory of elastic scattering of a beam of particles by atoms, 964.
- Khastgir (Dr. S. R.) and Chakravarty (M. K.), the effect of heat on the uni-polar electrical conductivity of carborundum, 127.
- Kinoshita (M.) and Oishi (J.), expansion and pressure coefficients of nitrogen, hydrogen, helium, and neon, and the absolute temperature of  $0^\circ\text{C}$ ., 52.
- Kirchhoff-Dirac function in problems involving solutions of the classical wave equation, some applications of the, 329.
- Knight (Dr. R. C.) and McMullen (B. W.), the potential of a screen of circular wires between two conducting planes, 35.
- Koizumi (S.), transformation formulæ of impedances and admittances in the method of symmetrical coordinates, 195.
- $L_x$ -lines of some nickel alloys, 190.
- Laguerre polynomials, on products of, 396.
- Lane (T. B.), Crowther (Prof. J. A.), and Liebmann (Dr. H.), an effect of X-radiation on colloidal carbon, 654.
- Laplacian transform circuit analysis, 502.
- Laws (Dr. B. C.), deflexion of thin rectangular plates clamped at the edges and uniformly loaded, 1072.
- Lebesgue complex integration, transformation of curves arising from, 256.
- Legendre functions of the first kind, some series and integrals for the associated, regarded as functions of their orders, 223.
- Lewis (T.), some applications of the Kirchhoff-Dirac functions in problems involving solutions of the classical wave equation, 329.
- Liebmann (Dr. H.), Lane (T. B.), and Crowther (Prof. J. A.), an effect of X-radiation on colloidal carbon, 654.
- Lowan (Dr. A. N.) on the operational determination of Green's functions in the theory of heat conduction, 62; on some two-dimensional problems in heat conduction, 410.
- McLachlan (Dr. N. W.), four expansions obtained operationally, 1055.
- McMullen (B. W.) and Knight (Dr. R. C.), the potential of a screen of circular wires between two conducting planes, 35.
- MacRobert (Prof. T. M.), some series and integrals for the associated Legendre functions of the first kind, regarded as functions of their orders, 223.
- Magneto-optical dispersion of organic liquids in the ultra-violet region of the spectrum.—Part XI. The magneto-optical dispersion of methyl malonate, isopropyl propionate, isopropyl butyrate, ethyl isobutyrate, and tertiary-butyl alcohol, 377.
- Makinson (R. E.), Somerville (J. M.), and Bailey (J. E.), the behaviour of electrons in bromine, 177.
- Marsden (Dr. C. Joyce) and Evans (Prof. E. J.), the magneto-optical dispersion of organic liquids in

- the ultra-violet region of the spectrum.—Part XI. The magneto-optical dispersion of methyl malonate, isopropyl propionate, isopropyl butyrate, ethyl isobutyrate, and tertiary-butyl alcohol, 377.
- Mason (Dr. W.), note on certain combined alternating stress systems and a stress criterion of the fatigue limit, 695.
- Mass in Newtonian mechanics, definition and determination of, 1012.
- Matrix theory of multiconductor transmission lines, 97.
- Mendelssohn (Dr. K.) and Pontius (R. B.), thermal conductivity of superconductors in a magnetic field, 777.
- Mercury arcs in capillary tubes, 312.
- Moisture films, the adsorbed, on the surface of glazed porcelain, 797.
- Molecules in chemical equilibrium, fluctuations of composition in a system of, 981.
- Morris (Rosa M.), notes on two-dimensional potential theory.—IV. The expression for the fluid energy and its application, 47; V. The generalized formulæ for the forces and couple on a moving cylinder, 445.
- Morrison (Prof. J. T.), note on the maximum correlation coefficient between two series whose values have been determined at equal intervals, 240.
- Mukherjee (Prof. K. K.), Kar (Prof. K. C.), and Ghosh (Prof. M.), the theory of elastic scattering of a beam of particles by atoms, 964.
- Multiconductor transmission lines, matrix theory of, 97.
- Newing (R. A.) on the variation calculation of eigen values, 114.
- Newtonian mechanics, definition and determination of mass in, 1012.
- Nickel and tungsten, crystal growth in wires of, 1001.
- alloys, the  $L\alpha$ -lines of some, 190.
- Nitrogen, hydrogen, helium, and neon, expansion and pressure coefficients of, and the absolute temperature of  $0^\circ\text{C.}$ , 52.
- Obituaries.—Ernest Lord Rutherford of Nelson; 1022; Dr. John Robinson Airey, 1135.
- Oishi (J.) and Kinoshita (M.), expansion and pressure coefficients of nitrogen, hydrogen, helium, and neon, and the absolute temperature of  $0^\circ\text{C.}$ , 52.
- Oosterhoff (L. J.), and Hermans (J. J.), the thermodynamical treatment of diffusion potentials, 304.
- Operational determination of Green's functions in the theory of heat conduction, 62.
- representations of products of parabolic cylinder functions and products of Laguerre polynomials, 1082.
- Orientation of the crystallites of electrodeposited hexagonal chromium, note on the preferred, 772.
- Oseen's approximation, the flow past a flat plate, to, 704.
- Parkin (L. W.), the refractive index of the alkali halides at low concentration, 890.
- Peltier heat, a note on the calculation of the, 598.
- Pendse (C. G.), a note on the definition and determination of mass in Newtonian mechanics, 1012.
- Pepsin, on the structure of, 940.
- Periodic motion in functional dynamics, 26.
- Piercy (Dr. N. A. V.), Piper (R. W.), and Preston (Dr. J. H.), a new family of wing profiles, 425.
- Piper (R. W.), extensions of the new family of wing profiles, 1114.
- , Piercy (Dr. N. A. V.), and Preston (Dr. J. H.), a new family of wing profiles, 425.
- Pipes (Dr. L. A.), matrix theory of multiconductor transmission lines, 97; Laplacian transform circuit analysis, 502.
- Pol (Balth. van der) and Bremmer (H.), the diffraction of electromagnetic waves from an electrical point source round a finitely conducting sphere, with applications to radiotelegraphy and the theory of the rainbow.—Part I., 141; Part II., 825.
- Pontius (R. B.), threshold values of superconductors of small dimensions, 787.
- and Mendelssohn (Dr. K.), thermal conductivity of superconductors in a magnetic field, 777.

- Poritsky (H.), thermal stresses in cylindrical pipes, 209.
- Porter (Prof. A. W.) on the calculation of surface tension from the measurement of sessile drops, 823.
- Potential of a screen of circular wires between two conducting planes, 35.
- theory, notes on two-dimensional.—IV. The expression for the fluid energy and its application, 47; V. The generalized formulæ for the forces and couple on a moving cylinder, 445.
- Preston (Dr. J. H.), Piercy (Dr. N. A. V.), and Piper (R. W.), a new family of wing profiles, 425.
- Propeller-blades, on the relation between thrust and torque distribution and the dimensions and the arrangement of, 745.
- Puls (H. O.) and Bond (Dr. W. N.), the change of surface tension with time, 864.
- Puschner (M.), Blüh (Dr. Grete), and Blüh (Dr. O.), measurements of thermal diffusion in gas mixtures, 1103.
- Radioactive elements, an apparatus for the production of, by means of radium, 582.
- Radiochemical investigations, Geiger-Müller counters for, 553.
- Raman spectra of some chloro-carbonates, 405.
- Rao (Dr. C. S.), change in water equilibrium and hydration in solutions of some typical electrolytes, 87.
- Rao (Dr. S. Ramachandra) and Sriraman (S.), the diamagnetic susceptibilities of some complex ions, 1025.
- Refractive index of the alkali halides at low concentrations, 890.
- Reissner (H.) on the relation between thrust and torque distribution and the dimensions and the arrangement of propeller-blades, 745.
- Rotating rope, a note on the vibrations of a, 293.
- Rutland (V. D. H.) and Bickley (Dr. W. G.), the flow past a flat plate, to Oseen's approximation, 704.
- Saint-Venant's principle, a general proof of, supplementary note on, 325.
- Schmidt (Dr. R. J.) on the instability of a spherical shell of fluid heated from within, 228.
- Sen (B.), note on the torsion of a curved rod, 263.
- Seth (Dr. B. R.), waves in a circular canal, 288.
- Shishacow (N. A.), free two-dimensional crystals of silicon pentoxide, 687.
- Silberstein (Dr. L.) on Einstein's gravitational field equations, 814.
- Silicon pentoxide, free two-dimensional crystals of, 687.
- Solid states, on the atomic forces of, 466.
- Somerville (J. M.), Bailey (J. E.), and Makinson (R. E. B.), the behaviour of electrons in bromine, 177.
- Specific heats, the determination of, by an eddy-current method.—Part I. Theoretical, 600; Part II. Experimental, 713.
- Spherical shell of fluid heated from within, on the instability of a, 228.
- Sriraman (S.) and Rao (Dr. S. Ramachandra), the diamagnetic susceptibilities of some complex ions, 1025.
- Stevenson (A. C.), a note on the vibrations of a spinning rope, 293.
- Stress criterion of the fatigue limit, note on certain combined alternating stress systems and a, 695.
- Supraconductors, thermal conductivity of, in a magnetic field, 777.
- in alternating magnetic fields, experiments on, 361.
- of small dimensions, threshold values of, 787.
- Surface tension, change of, with time, 864.
- — —, the calculation of, from the measurement of sessile drops, 823.
- Telephone receivers, acoustical experiments with.—Part I., 665; Part II., 905.
- Teller (E.), Topley (B.), and Donnan (F. G.), fluctuations of composition in a system of molecules in chemical equilibrium, 981.
